This Back-to-School Essential Keeps Delivering All Year.

Northwest Security Inc. has many different options to help safeguard your family and home. The security industry has changed from just a standard telephone alarm system to complete home or business protection. We would love to review a few back-to-school essentials for many working families.

- **Keyless Smart Locks** – Family members have codes for easy access into the home. If a code is forgotten, remote access allows you to unlock the door from any location.
- **Arming / Dis-Arming Reminders** – You can schedule reminders or notifications in the system. You can see if your children arrived home on time, or if they forgot to set the alarm system when they left.
- **Wireless 1080P HD Indoor and Outdoor Cameras** – Get a clear view of when your children arrive home. What are your children watching on TV? See what is really happening. If you hear a bump in the night, you have the ability to access your infra-red night vision cameras right from your smart phone (Multi Camera Systems Available).

Our cutting-edge smart home technology system has many more features. Call today to see if your system is compatible.

Call Today (928) 681-3111

Back-to-School Special

**Add (1) Indoor Camera to
existing Alarm System**

**No Installation or Equipment Charge
\$55.00 New Monthly Rate with Camera App***
